

DHANUSH RAJASHEKAR

07587577482 | ghanushrajashekar@outlook.com | ghanushrajashekar.github.io/Portfolio | linkedin.com/in/ghanushrajashekar

SKILLS

Back-end Technologies: Java, Spring Boot, Apache Kafka, Microservices, AWS Cloud, CI/CD

Front-end Technologies: Angular 12+, HTML, CSS, Socket.io

Databases: MySQL, SQL, NoSQL

Testing Frameworks and Others: TDD, Junit, Docker, Kubernetes, Agile Methodologies, JWT

EXPERIENCE

Barclays UK

Customer Operations Analyst - [Part Time] |

barclays.co.uk

Jun 2025 – Present

Glasgow, United Kingdom

- Resolved complex account, balance, transaction and payment queries as First Point of Contact using FullServe and core banking systems, achieving 100% QA pass rate under strict regulatory controls.
- Investigated customer data and account activity in real-time, applied risk controls to prevent fraud and delivered accurate policy-aligned outcomes that boosted retention.
- Delivered SME support and led call listening sessions for new joiners, training on systems, policies and case handling to drive team performance and 17+ NPS scores.
- Managed high-risk escalations with precise documentation and handovers while maintaining full compliance with data protection and safeguarding standards.

Sonata Software

Software Engineer | sonata-software.com

Aug 2022 – Nov 2023

Bangalore, India

- Evaluated and optimized web application performance by identifying improvement areas and delivering efficient solutions.
- Reduced Kanban triage time by 26%, improving customer satisfaction and accelerating issue resolution.
- Delivered frontend migration support from JSP to Angular 12, reducing UI latency by 19%, and enabled backend migration from Java 11 to Java 17 for Spring Boot 3.x readiness.
- Partnered with Product Managers and cross-functional teams to integrate ASSA ABLOY products into the ASSA ABLOY web application.
- Automated release operations using Python scripts, reducing manual effort for updating application help content.
- Designed visualizations with z/OS developers for ASSA ABLOY product metrics, including CPU usage and execution time, to identify applications requiring tuning.
- Implemented a TDD approach to improve test coverage and coordinated with front-end and UI/UX teams on API issues and application re-branding.

DreamBuzz Solutions

Java Developer | dreambuzz.in

May 2020 – Jan 2022

Bangalore, India

- Developed comprehensive solutions for a Health Care firm using Java, Spring, Rest Web Services, and MySQL, enabling seamless development, testing, one-click deployment, and cloud integration.
- Developed Mobile Rx feature, compatible with small devices enabling practitioner to prescribe medications to patients directly via mobile phones.
- Delivered FHIR API integration, resulting in a 10% increase in EHR license renewals and improved product offerings.
- Collaborated with product managers and senior developers in code reviews, performance optimizations, architectural design and refining Jira stories aligning with business goals.
- Facilitated product deployment in production, was the first developer to perform and understand CI/CD flow in the production deployment.
- Gained practical experience in leveraging Docker for containerization, establishing a standardized development environment, and ensuring application portability across various platforms.

PROJECTS

Expense Splitter - [Frontend](#) | [Backend](#)

- Built a full-stack expense management system using Spring Boot and Angular, with group creation, bill splitting (equal and custom), and automated net balance calculation with MySQL and Spring Data JPA.
- Implemented real-time WebSocket notifications via STOMP and SockJS for active users and SMTP email alerts for offline users using JavaMailSender.
- Secured the app with JWT authentication covering registration, email activation, login, password reset, and account recovery using BCrypt hashing.
- Deployed on AWS EC2 with Nginx as a reverse proxy for frontend serving and API routing, and configured AWS Route 53 for domain management.
- Architected a layered REST API with Spring Boot MVC, structuring the codebase across controllers, services, and repositories with Spring Data JPA and MySQL.

Issue Tracker - [Frontend](#) | [Backend](#)

- Designed and developed a full-stack issue management system using Java Spring Boot for REST APIs, Bootstrap 5 for the frontend, and MySQL with Spring Data JPA for persistent storage.
- Delivered real-time issue updates and in-browser notifications using WebSocket and STOMP protocol, improving team responsiveness and reducing missed updates.
- Enforced secure authentication, authorization, and session management using JSON Web Tokens (JWT) with HMAC-SHA512 signing and BCrypt password hashing.
- Deployed the backend as a standalone JAR on AWS EC2 with MySQL and configured Nginx as a reverse proxy to serve the frontend and route API traffic.
- Built core features including issue creation and lifecycle tracking, a watch mechanism, role-based access control (RBAC) with three permission tiers, and automated email notifications.

EDUCATION

University Of Strathclyde

Glasgow, United Kingdom

Master's, Advanced Computer Science - Merit

Jan 2024 – Jan 2025

- Built Machine Learning and Deep Learning models using sklearn, transfer learning with TensorFlow, PyTorch for regression and classification problems.
- Built an android Fitness Tracker application focused on weight loss that tracked calories and utilized mobile sensors such as pedometer for step count, location for Geofencing, Google Sleep API for real time notification in agreement with Fogg's behaviour change model (Kotlin, Jetpack Compose). [Github Link](#)
- Gained expertise in search-based software engineering, solved single and multi-objective problems using climber and genetic algorithms with Python and DEAP framework.

Global Academy Of Technology

Bangalore, India

B.E, Computer Science

Apr 2018 – Apr 2022

- Applied foundation knowledge that gained while learning Operating Systems, Object Oriented Programming, Database Management Systems and J2EE Web Development to build a [Online Canteen management System](#) in 3rd year for our student institution.
- Completed an intensive 3-months of full stack development programme at Prinston Smart Solutions, developing web applications using Java, JavaScript, jQuery and Oracle database.
- In final year, developed and published a paper on [Voice Based Email System For Visually Impaired People](#).
